The National Broadband Network: What Difference Does It Make?

[Dr Leith Campbell](#) [2]

Tue, 26 Jun 2018 - 12:30pm AEST

Dr Leith Campbell

Leith Campbell is an Honorary Fellow at the Melbourne School of Engineering, University of Melbourne. He has had a career of over 30 years in telecommunications research and development, beginning in the 1980s at the now-fabled Bell Telephone Laboratories in the US, where he worked on access network planning when optical fibre was just appearing in the local loop.

Returning to Australia in the late 1980s, he worked at Telstra Research Laboratories and later was CEO of the Australian Telecommunications Cooperative Research Centre. In his last full-time position, he worked at Ovum as an international telecommunications consultant.
